

What Is Claimed Is:

1 1. An inflatable product, including:
2 a first chamber;
3 a first valve;
4 an air pump for inflating the first chamber through the
5 first valve;
6 a first switch for activating the air pump and opening
7 the first valve;
8 a second chamber;
9 a second valve through which the air pump inflates the
10 second chamber;
11 a second switch to activate the air pump and open the
12 second valve;
13 wherein the air pump has a first pair of electrodes and
14 a second pair of electrodes, the air pump operating in a
15 first direction when the first pair of electrodes contact
16 each other, the air pump operating in a second, reverse
17 direction opposite to the first direction when the second
18 pair of electrodes contact each other, and the first switch
19 controls the air pump to operate, and the second switch also
20 controls the air pump to operate.

1 2. An inflatable product as claimed in claim 1, further
2 including a slider connected to the first and second pairs of
3 electrodes and provided beside the first and second switches
4 in such a way that the air pump is activated by the first
5 switch and the second switch via the slider.
